

October 2009- H1N1

December 2009- furnace explosion

Jan-March- searched every doctor specialist- knew something was wrong but couldn't pin point it-

April- first trip to Cleveland

2 bone marrow biopsies

Fat pad aspiration test

May- June- 2 more trips to Cleveland- more tests

June 9- heart biopsy

June 11- Gall bladder surgery

June 12-15- recovery- internal bleeding

June 15- diagnosed amyloid

June 16- first chemo treatment

June 17- blood pressure dropped- ICU

June 18- conditioned worse fluid overload, drop in pressures, moved to CCU- kidneys shut down, put on life support-dialysis started

June 26th- 40th birthday in SICU

June 28th- ruptured spleen- almost lost him- surgery saved his life

June 12th- tracheotomy surgery

June 13th- a new hope, a new beginning-

That's our story!
